

Columbia Presbyterian Medical Center New York, NY

Projects include a \$1 million renovation of a Labor and Delivery Suite within the Allen Pavilion; a master plan for Babies and Children's Hospital; a \$2.5 million renovation to create offices and examination rooms for the Department of Orthopedic Surgery; and the design of a new 12,000 sq ft dermatology suite. Additional projects include a major ER renovation constructed within a fully operational ER department; a new PICU created from the conversion of the 9th floor of Babies and Children's Hospital; the conversion of five floors within the Atchley Pavilion to create the Irving Cancer Center; and the conversion of 7,000 sq ft on the 7th floor of the Harkness Eye Institute to create new ORs.
